

## ***Naviscan Expands Global Distribution into Japan***

**San Diego, CA** - November 17, 2009 -Naviscan, Inc., the leader in Molecular Breast Imaging (MBI), has entered into a distribution agreement with SCETI, K.K. to market and sell Naviscan's Positron Emission Mammography (PEM) scanner in Japan. Adding to its existing distribution network in South Korea, Mexico, Venezuela, and Colombia, partnering with SCETI expands Naviscan's global presence and further provides physicians and patients access to PEM imaging. The first PEM installation in Japan will be the Yuai Clinic Diagnostic Imaging Center in Yokohama, a premier diagnostic imaging with an unprecedented eight PET scanners.

SCETI is a leader in the Japanese market for Nuclear Medicine and Medical Devices. As a leading distributor of cyclotrons and hot lab supplies which contribute to the production of Fluorodeoxyglucose or FDG (the positron-emitting radioactive isotope used in PEM), the Naviscan PEM scanner complements SCETI's suite of molecular imaging solutions.

"We are extremely pleased to announce this partnership," said Paul Mirabella, Naviscan Chairman and CEO. "SCETI is highly regarded in the molecular imaging industry and will be an ideal partner as we establish ourselves in the Japanese market."

### **About Naviscan, Inc.**

Naviscan Inc., founded in 1995, develops and markets compact, high-resolution PET scanners intended to provide organ-specific molecular imaging, guide radiological and surgical procedures and advance new clinical therapies. The Naviscan PET scanner is currently installed and available in breast and imaging centers throughout the U.S. as well as utilized in clinical research studies, funded in part by the National Institutes of Health. The Company is headquartered in San Diego, California and is the first company to obtain FDA clearance of a high-resolution PET scanner designed to image small body parts.
